

LECTURE BY MAJ GEN TIKKU(RETD)

The AIL Center for Research in Social Sciences (ACRSS) organised a guest lecture in the Multi Purpose Hall on 29th September, 2022, on the topic "Life and how to live it right" which was delivered by Maj Gen RN Tikku(Retd.) Gen Tikku started the lecture by telling the audience about the importance of good education. He stated that true education can only begin out of a foundation of self-awareness, the key to self-discovery. It gives a new perspective outside the constant 'I', 'Me' and 'Mine' syndrome of the ego. Well-schooled children dread being alone, so they seek constant companionship through TV, computer, cell phone, and shallow friendships quickly acquired and quickly abandoned. Let us challenge the students to learn to live consciously; feel the environment; enjoy own company; and reflect on knowing themselves better.

He further mentioned that India's history, its rich cultural heritage, marvels of creation within the human body and outside, meaningful activities on 'Earth Day' and 'National Youth Day', raise the level of awareness and help the child in building a relationship to a higher purpose. Every child has the urge 'to be recognised'.

Students were encouraged to ask questions and the participation was hearty. This informative and thought provoking session ended with a huge round of applause and some very motivating words of affirmation by Sir.
